From electric drivers For electric drivers

Every product for recharge that we make, is what we would have wanted to find in the market. That's how Silla Industries was born and this is the promise that we want to keep to you as well.

For the company that recharges the corporate fleet
For charging at work...or during holidays, at your hotel
For those who have an electric car and don't want to depend on always charging on the road.

**We have
the solution for you
and it is:**

Made in Italy

Easy to use and install

Safe

Stackable

Future Proof

SILLA'S SOLUTIONS

FOR PRIVATE AND SEMI-PUBLIC LOCATIONS

PRISM BASIC

EV 230V charger with load balancing sensor and protective RCD for maximum safety of use. Single-phase 7.4kW with a 5m cable. Upgradable later on to the Prism Solar version thanks to the Smart Cover (optional).

PRISM SOLAR

The acclaimed Prism charging station with solar energy management, RFID reader and Horeca function for public establishments. Single-phase and three-phase, 7.4 to 22 kW. OCPP 1.6, API, MQTT and connectivity via ethernet or WiFi.

PRISM SOLAR S

With all the features that have made Prism Solar so popular but equipped with a socket instead of cable and connector. Type 2S plug with shutter for maximum safety of use. Optional GSM connectivity.

ENERGY HUB 149

The unified energy resource management center for a home or small office: solar inverter, grid inverter, storage, EV charging station, router, UPS function.

SILLA'S SOLUTIONS

FOR PRIVATE AND SEMI-PUBLIC LOCATIONS

TOTEM

Floor or wall mounting, available in versions with 2 Type 2S sockets with shutter or with cables and connectors, offers two AC outlets of 22kW each. OCPP, RFID, GSM (optional), MID (optional), Display for access and verification management of charging sessions.

DUKE44

The bidirectional DC charger designed for the V2H and V2G, equipped with two CCS2 outputs of 22 kW each or 1 x 44kW when only one output is in usage. Metal enclosure, display, OCPP 1.6, RFID and full connectivity.
